ADP Support Matrix

Micro Focus ArcSight Security products are a next-generation of data collection and storage engine that unifies log data collection, storage, and security data management in a scalable, high-performance software or appliance solution.

This document discusses operating system (OS), appliance, browser, and other support details for ArcSight Management Center (ArcMC), Logger, Transformation Hub and ArcSight SmartConnectors.

Abbreviations Used in this Document

Abbreviation	Description
RHEL	Red Hat Enterprise Linux
OEL	Oracle Enterprise Linux
CentOS	Community Enterprise Operating System
IE	Internet Explorer
FF	Firefox
ESR	Extended Support Release (of Firefox)

OS Support Policy

- A **certified** operating system means that platform support has been tested and certified with regression tests for the SmartConnector version.

ArcSight will accept support calls and address bugs for installations on the platform.

SmartConnector runs only on the platforms that are applicable to the connector type and specific device type. For example, the SmartConnector for Microsoft Windows Event Log runs on Windows platforms only.

- A **supported** operating system means means that ArcSight has performed a general run-through to verify that the platform support works as expected.

ArcSight will accept support calls and address bugs for installations.

Currently Supported ArcMC Versions

The following table lists the supported appliance models, operating systems, supported browsers, and upgrade paths for each currently supported ArcMC/CHA version.

An asterisk (*) next to a browser version indicates that the browser version supported is the one current at the date of release.
