ArcSight Forwarding Connector Release Notes

These release notes provide information for the current release of the ArcSight Forwarding Connector.

ArcSight ESM Forwarding Connector

The ArcSight ESM Forwarding Connector can receive events from a source ESM Manager and then send them to a secondary destination ESM Manager, a non-ESM location (such as HP Operations Manager), or to an ArcSight Logger.

The ESM or ArcSight Express version with which this Forwarding Connector is released may not support all Forwarding Connector features. Refer to the ESM or ArcSight Express release notes for details about what Forwarding Connector features the accompanying version of ESM or ArcSight Express supports.

What's New in the ArcSight Forwarding Connector

Added full 64-bit JVM package support including wrapper libraries and fixed Known Issue CON-12005.

To Apply This Release

If you are performing an upgrade from ArcSight Express 3.0 to ArcSight Express 4.0, download and install the appropriate executable for your platform from the HP SSO site at <http://support.openview.hp.com>. Otherwise, see the *ArcSight Express Configuration Guide*, chapter “Configuring the ArcSight Express Appliance”, section “Post Configuration Steps”, for the location of the Forwarding Connector installation executable.

Note that these version numbers are specific to Forwarding Connector releases, not release numbers of other ArcSight products.

Be sure to check the ESM release notes for supported Forwarding Connector upgrade paths.

The installation executable is:

- ArcSight-5.2.7.6582.0-SuperConnector-Linux64.bin

Known Issues

Number	Description
CON-12107	<p>The certificate auto-import feature does not work for FIPS Suite B.</p> <p>Workaround:</p> <p>The certificate must be manually imported for FIPS Suite B installations.</p>
