ArcSight Forwarding Connector Release Notes

These release notes provide information for the current release of the ArcSight Forwarding Connector.

ArcSight ESM Forwarding Connector

The ArcSight ESM Forwarding Connector can receive events from a source ESM Manager and then send them to a secondary destination ESM Manager, a non-ESM location (such as HP Operations Manager), or to an ArcSight Logger.

What's New in the ArcSight Forwarding Connector

A new installation wizard has been added.

To Apply This Release

ArcSight recommends using the Forwarding Connector executable included with the corresponding ESM or HP integration release. Download and install the appropriate executable for your platform from the HP SSO site at <http://support.openview.hp.com>. Note that these version numbers are specific to Forwarding Connector releases, not release numbers of other ArcSight products.

Be sure to check the ESM release notes for supported Forwarding Connector upgrade paths.

The installation executables are:

- ArcSight-5.2.5.6403.0-SuperConnector64-Linux.bin

Known Issues

Number	Description
CON-12005	<p>The certificate auto-import feature will only import certificates from the initial configuration. The installation wizard should allow the auto-import of the manager certificate for every manager added to it.</p> <p>Workaround:</p> <p>Any changes or additions to the destinations require manually importing the certificate for those destinations.</p>
CON-12107	<p>The certificate auto-import feature does not work for FIPS Suite B.</p> <p>Workaround:</p> <p>The certificate must be manually imported for FIPS Suite B installations.</p>
