## Product Overview

The Asset Model Import FlexConnector allows you to develop a model import connector to import the asset model data from a file. This enables you to create and maintain ESM Network Model data, and keep this data in sync with the data in your Asset Management system. Based on configuration, files are read by the connector, converted to XML based on parser attributes. Upon generation, the XML files are automatically transferred by the connector to the ESM server.

CSV is the only file format supported.

## Supported Platforms

The Asset Model Import FlexConnector supports the following platforms:

- Microsoft Windows Server 2008 R2, 64-bit
- Microsoft Windows Server 2012 R2, 64-bit
- Red Hat Enterprise Linux (RHEL) 6.6, 64-bit
- Red Hat Enterprise Linux (RHEL) 7.0, 64-bit
