Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To verify you are using the most recent edition of a document, go to

[https://softwaresupport.softwaregrp.com/group/softwaresupport/search-result?doctype=online help](https://softwaresupport.softwaregrp.com/group/softwaresupport/search-result?doctype=online+help).

You will also receive new or updated editions of documentation if you subscribe to the appropriate product support service. Contact your Micro Focus sales representative for details.

To check for new versions of software, go to <https://www.hpe.com/software/entitlements>. To check for recent software patches, go to <https://softwaresupport.softwaregrp.com/patches>.

The sites listed in this section require you to sign in with a Software Passport. You can register for a Passport through a link on the site.

Support

Visit the Micro Focus Software Support Online website at <https://softwaresupport.softwaregrp.com>.

This website provides contact information and details about the products, services, and support that Micro Focus offers.

Micro Focus online support provides customer self-solve capabilities. It provides a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the support website to:

- Search for knowledge documents of interest
- Submit and track support cases and enhancement requests
- Access the Software Licenses and Downloads portal
- Download software patches
- Access product documentation
- Manage support contracts
- Look up Micro Focus support contacts
- Review information about available services
- Enter into discussions with other software customers
- Research and register for software training

Most of the support areas require you to register as a Passport user and sign in. Many also require a support contract.

You can register for a Software Passport through a link on the Software Support Online site.

To find more information about access levels, go to

<https://softwaresupport.softwaregrp.com/web/softwaresupport/access-levels>.

New in this Release 5

Resolved Issues 6

Documentation 7

New in this Release

This section lists the enhancements to IDOL Site Admin version 12.0.0.

- IDOL Site Admin can now display statistics results from the IDOL Statistics Server component, using the embedded IDOL Admin interface. The Statistics page is available from the Monitor menu, when you access IDOL Admin from Statistics Server.
- The Content component Regenerate option is now available for the new geospatial index, in the embedded IDOL Admin interface.
- You can now edit the configuration file of services in IDOL Site Admin from the Service Control tab.
- When you register a service, IDOL Site Admin now automatically sets the service type from the `autn:commonname` that the service returns, if it is running. IDOL Site Admin now displays the type in the list of registered services. You can manually change it by using the Edit Service button.

Resolved Issues

This section lists the resolved issues in IDOL Site Admin version 12.0.0.

- Document tracking did not show the source correctly when the component name contained an underscore character.
- The details of child components of a Distributed Connector were not displayed correctly.
- The loaded resources for an IDOL Speech Server component were not displayed correctly.
- When a component had only one configured log stream, the log page did not display the logs correctly.
- Changing the database privilege did not update the value displayed in the interface until the whole page was refreshed.
- When the IDOL Content [LanguageTypes] configuration used a non-canonical name for a language, the **Languages only** table in the Languages status page displayed incorrect document counts.
- On the Edit Service Control Method page, pressing Enter when focusing in the Script text input could cause the whole page to reload.
- On the Service Control page, some tooltips continued to be displayed after the user moved their cursor or the page was scrolled.
- When a service failed to start after being started from the Service Control page, IDOL Site Admin sometimes waited forever for the service to start. It now shows that start up failed, and reenables the start button.
- The IDOL Site Admin session cookie used the generic name JSESSIONID, which could result in session IDs being overwritten when multiple applications were run from the same domain. The IDOL Site Admin session cookie is now called ISASESSIONID.

NOTE:

If you want to run multiple IDOL Site Admin instances from the same domain, you can override the session cookie ID by adding the following argument to the Java run command:

```
-Dserver.session.cookie.name=MYNEWSESSIONNAME
```

This option allows you to keep the session details separate for your IDOL Site Admin instances.

Documentation

The following documentation was updated for this release.

- *IDOL Site Admin Installation Guide*
- *IDOL Site Admin User Guide*
- *Coordinator Reference*
- *Controller Reference*
