Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit https://www.microfocus.com/support-and-services/documentation/.

Support

Visit the MySupport portal to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the Access Levels descriptions.

Contents

New in this Release

The following new features were released in Web Connector version 12.10.0.

- The connector uses canonical paths to identify pages, for example in IDOL document references. In previous versions of the connector, the URLs `http://www.example.com/page.html` and `http://www.example.com/dir/../page.html` were considered to be different and the connector would ingest two separate documents.

- The configuration parameter `RSSXSLFilePath` has been added. This specifies an XSL transformation to use to convert an RSS feed into HTML, so that it can be processed by the connector. The specified transformation is applied only if the RSS feed does not supply its own XSL transform. A transform named `RSSTransform.xsl` is supplied with the connector. You can use this to transform XML that complies with the RSS specification.

- The third-party libraries libxml2 and libxslt have been updated, to versions 2.9.11 and 1.1.34 respectively.

Resolved Issues

The following issues were resolved in Web Connector version 12.10.0.

- The embedded web browser (WKOOP) could fail to start when the connector was used in NiFi and NiFi had many open file handles.

- The `ViewWeb` NiFi processor failed to retrieve documents for viewing.

- The `QueueInfo` action (with `QueueAction=GetStatus`) would return an error when the total number of actions exceeded 999.

Supported Operating System Platforms

Web Connector 12.10.0 is supported on the following platforms.

Windows x86-64

- Windows Server 2019

- Windows Server 2016

- Windows Server 2012

Linux x86-64

The minimum supported versions of particular distributions are:

- Red Hat Enterprise Linux (RHEL) 7

- CentOS 7

- SuSE Linux Enterprise Server (SLES) 12

- Ubuntu 14.04

- Debian 8

NOTE: On Linux platforms there are some prerequisites that you must install. For more information, refer to the Web Connector documentation.

Documentation

The following documentation was updated for Web Connector version 12.10.0.
