Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

New in this Release 4

Resolved Issues 5

Documentation 6

New in this Release

The following new features were released in Find version 12.5.0.

- Improved responsiveness when you have a large IDOL index and use parametric filters to refine search results.
- Find can use custom viewing error responses when you configure them in your IDOL View Component.

NOTE: You do not need to upgrade or modify your Find setup to use custom view errors. For more information, refer to the *IDOL View Component Reference*.

Resolved Issues

The following issues were resolved in Find version 12.5.0.

- A user could not filter search results using numeric or numeric date fields unless they were a member of the FindBI role.
- A CSV file produced by exporting query results would be empty when all of the documents in the result set were secured using mapped security.

Documentation

The following documentation was updated for Find version 12.5.0.

- *Find Administration Guide*
