Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit https://www.microfocus.com/support-and-services/documentation/.

Support

Visit the MySupport portal to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the Access Levels descriptions.

Contents

New in this Release

The following new features were released in Find version 12.6.0.

- For parametric field filters, Find now has a button to select or deselect all loaded values at once.

- You can now use ControlPoint to apply a policy to documents that were returned by a search (unsaved, saved, or a snapshot). You can configure the connection to ControlPoint on the Settings page. To use this feature, you must have ControlPoint version 5.9 or later.

- A new document selection filter has been added, to allow you to manually deselect documents to exclude them from a search. The `documentSelectionFilter` option has been added to the `uiCustomization.filterOrder` property in the default Find configuration file. If you are upgrading an existing installation, Find will automatically add the new option to the end of the `uiCustomization.filterOrder` property.

Resolved Issues

The following issues were resolved in Find version 12.6.0.

- The HTTP OPTIONS method has been disabled.

Documentation

The following documentation was updated for Find version 12.6.0.

- *Find Administration Guide*
