Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit https://www.microfocus.com/support-and-services/documentation/.

Support

Visit the MySupport portal to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the Access Levels descriptions.

Contents

New in this Release

The following new features were released in IDOL Admin version 12.8.0.

- All features that require unlicensed actions are now disabled in the IDOL Admin user interface. Previously the IDOL Admin behavior varied between features.

- When running IDOL Admin with the IDOL Community component, IDOL Admin now uses a POST request when setting user passwords, instead of a GET request. This option improves password security, because the password is less likely to be logged (for example by a proxy server).

- When running IDOL Admin with the License Server, there is now a button to allow you to update the license, at Control > Console > Service Control > Update License.

Resolved Issues

There were no resolved issues in IDOL Admin version 12.8.0.

Documentation

The following documentation was updated for IDOL Admin version 12.8.0.
